Project: /82.5

Weighted total out of 40 points

(10 points) As a web developer, I want to make a wireframe or prototype for my website so that my portfolio site has a design to follow **(only required to make wireframe or prototype for home page and project page, with other two being optional)**.

(2.5 points) As a web developer, I want my home page to be saved as 'index.html'

(7.5 points) As a web developer, I want to build a 'home' page and contain relevant content.

(7.5 points) As a web developer, I want to build an 'about me' page and contain relevant content.

(7.5 points) As a web developer, I want to build a 'projects' page and contain relevant content.

(7.5 points) As a web developer, I want to build a 'contact' page and contain relevant content.

(10 points) As a web developer, I want to have an external CSS stylesheet that consists of custom styles.

(10 points) As a web developer, I want to integrate with the Bootstrap responsive library to help structure and style my website.

(5 points) As a web developer, I want to have high-quality images, including an image of myself on my 'about me' page.

(5 points) As a web developer, I want to have project titles, images, and descriptions of any projects I currently have as well as project placeholders (title, description, image, etc.) for any future projects that will be placed on my 'projects' page.

(10 points) As a web developer, I want to produce high-quality, original content so that any text written on my portfolio site is engaging and without spelling and grammar mistakes.

Bonus:

As a web developer, I want my website to be mobile responsive.
